

**Philip Pardey**, an Australian native, is Professor of Science and Technology Policy in the Department of Applied Economics at the University of Minnesota where he also directs the University's International Science and Technology Practice and Policy (InSTePP) center. Previously he was a senior research fellow at the International Food Policy Research Institute, Washington D.C. where he led the institute's Science and Technology Policy Program, and prior to 1994 at the International Service for National Agricultural Research in The Hague, Netherlands. He is a graduate of the University of Adelaide, Australia, and obtained a doctoral degree in agricultural economics from the University of Minnesota. He is a Fellow of the American Agricultural Economics Association and a Distinguished Fellow of the Australian Agricultural and Resource Economics Society. Philip has considerable international experience, leading regional projects in Asia, sub-Saharan Africa and Latin America and the Caribbean, and country projects in Argentina, Australia, Brazil, China, Indonesia, Kenya, Niger, and the United States.

His research deals with the finance and conduct of R&D globally, methods for assessing the economic impacts of research, and the economic and policy (especially intellectual property) aspects of genetic resources and the biosciences. He is author of more than 215 books, articles, and papers, including, *Ending Hunger in Our Lifetime: Food Security and Globalization* (John Hopkins University Press, 2003), *Saving Seeds: The Economics of Conserving Crop Genetic Resources Ex Situ in the Future Harvest Centers of the CGIAR* (CAB International 2004), and *Agricultural R&D in the Developing World: Too Little, Too Late?* (International Food Policy Research Institute, 2006).
