Jobs

Research Assistant

The Department of Agricultural and Applied Economics at the University of Georgia is recruiting Ph.D. students to participate in research projects in the areas of agricultural production, marketing, and farm and agribusiness management. Selected students will identify specific research topics, which may focus on issues related to row crop, fruit and vegetable, ornamental horticulture, or livestock production or marketing; farm, agribusiness, or cooperative management; impacts of agricultural policy at the farm and agribusiness levels; or other policy-relevant topics. Assistant/Associate Professor

There is a 9 month tenure track position in the Department of Agricultural Economics and Agribusiness with joint appointments in the LSU College of Agriculture and the Louisiana Agricultural Experiment Station. The person in this position is responsible for developing a nationally recognized teaching and research program in the area of natural resource economics with a focus on coastal resource policy analysis and other relevant natural resource issues. Duties will include supporting the department's teaching program by teaching undergraduate and/or graduate courses including courses in one or more of the following areas: natural resource economics, environmental economics, and resource management, as well as undergraduate and graduate student advising. The incumbent will be positioned within the department's Center for Natural Resource Economics and Policy and is expected to work closely with affiliated units on campus, such as the Louisiana Sea Grant College Program, School of Renewable Natural Resources, and School of the Coast and Environment. The individual in this position will conduct economic analyses using conceptual and quantitative methods to inform policy considerations of coastal resource management, protection, and restoration strategies in the Mississippi River Delta region. Fellowship

Duke Kunshan University is now accepting applications for the new international Master of Environmental Policy (iMEP) Program. The iMEP program is a two-year degree offered jointly by Duke's Sanford School of Public Policy and Nicholas School of the Environment. Students will study core courses in both environmental management and public policy at Duke Kunshan University and Duke University. Combining a world-class faculty, a cutting-edge research center, a multi-culture experience and an innovative curriculum, the [Master of Environmental Policy Program](#) prepares students for unparalleled career opportunities. Students of the iMEP program emerge with the skills they need to forge evidence-based environmental policy solutions in the public and private sectors. They will have access to a host of resources including research opportunities at the [Environmental Research Center](#), career coaches, workshops, webinars, career fairs, library resources and proprietary job

databases. Students will also have the opportunity to be paired with career advisors who are there to share first-hand experiences and offer personalized advice to help them hone professional skills. For questions and to apply, contact [Ms. Wanyong Ge](#).

Economist

The Institute of Social and Economic Research at the University of Alaska Anchorage is looking for a research professional to conduct economic analysis and assist faculty in collecting data, conducting analysis, and writing reports. We are looking for someone who is able to use economic theory and econometric techniques to examine complex questions that arise in the fields of fiscal policy, health economics, and resource economics.

The position requires knowledge of, or interest in, microeconomics, a broad range of research skills, and the ability to perform quantitative analysis. Research professionals interact closely with other research professionals and faculty members in nearly all aspects of work including a variety of quantitative and qualitative tasks, such as: (a) data gathering and analysis; (b) conducting literature reviews; (c) production of reports, presentations, refereed publications; and (d) ensuring the quality of all work products.
