Call for fall 2019 work-study opportunities for CFANS students

The College seeks help in identifying part-time jobs or work study opportunities for CFANS students for the upcoming fall semester, 2019. The goal is to identify faculty and staff who have part-time positions available next semester, and place our students in as many of those positions as possible. If you are interested in hiring and undergraduate work-study student or part-time student employee, please email Sadie Brendalen, who will send you the form to complete and information on further steps.

Jobs

Postdoctoral Employee

The Department of Urban Planning and Public Policy, in the School of Social Ecology seeks applications to fill a full-time Postdoctoral Employee position in water resources policy. Candidates are required to have a PhD in such fields as natural resources management, environmental economics, water resources engineering, geography, or other fields related to water resources policy. The successful candidate will collaborate with a team of graduate and undergraduate students working on a coordinated set of water resources projects that will manage large datasets. Topics of active research include drinking water quality policy and flood risk management. The postdoctoral fellow can engage in one or both of these topics. Areas of particular interest for drinking water quality include evaluation of the effectiveness of federal and state regulation to ensure safe water for all. Relevant topics related to flood risk management include a national assessment of social vulnerability and disparities in post-disaster assistance.

Apply online

Assistant Extension Professor
The Division of Applied Social Sciences, College of Agriculture, Food, and Natural Resources, at the University of Missouri, seeks to recruit a faculty member with experience in economic modeling and data-driven regional economic research. The incumbent will engage with MU’s Business and Communities Extension Program and build effective working relationships with others across campus and across the state to help support an integrated approach to regional economic development in Missouri. Use Job ID #30591 when applying.

Postdoctoral Fellow
The School of Marine and Environmental Affairs at the University of Washington, in collaboration with the Northwest Fisheries Science Center, is looking for a post-doctoral research fellow to contribute to research investigating the economics of conservation planning for salmon recovery in the Pacific Northwest of the United States. The post-doc will work closely with Drs. Jardine, Fonner, and Holland to evaluate management scenarios to investigate the cost effectiveness of alternative conservation actions or strategies. The candidate will integrate models of biophysical processes affecting salmon survival (e.g. life cycle models) and data on costs of salmon recovery projects to predict the costs, benefits, and other outcomes of interest, associated with the management scenarios.

Economist
The Minnesota Department of Human Services is seeking a PhD economist within the next couple of months to join their team of economists. The Reports & Forecasts division of the Minnesota Department of Human Services has a team of 4 PhD economists who provide forecasts, fiscal analysis and reports for Medicaid, TANF, and other public benefit programs. Due to retirement, we plan to hire another economist in the near future.

A background in health economics and/or time-series forecasting is a plus, but not necessary. The work requires analysis of monthly data on public program caseloads and payments, the ability to apply economic reasoning to policy issues, and the skills to explain fiscal forecasts and analyses to a broad audience. The candidate should have the desire and the ability to become an expert in specific state public policy areas, with understanding of both the relevant data and policy details. Solid econometric training is necessary, but specific data techniques can be learned on the job. Click the button below to contact Susan Snyder for more information and application.

Recruitment and Communications Coordinator
The Agricultural Education, Communication and Marketing program at the University of Minnesota, Department of Applied Economics and Agricultural Education is hiring a **Recruitment and Communications Coordinator**. They are seeking an energetic professional to lead recruitment and marketing efforts for AECM. The specific focus will be to recruit students for Ag Ed undergraduate and graduate majors leading to teacher licensure, and recruit students for the ACM undergraduate major. The ideal candidate has expertise with a range of recruitment and marketing strategies; strong interpersonal and communication skills to build relationships with prospective students and their parents/guardians; and ability to collaborate with faculty, staff, and students in Ag Ed and ACM as well as the Office of Admissions, other CFANS and University units, and the broader stakeholder community. Apply using job ID 331263.
